

Celebrating
A Year Without A
STROKE

“Decide
today to
make one
positive
change on
your path to
living a
healthier
life.”

Sue Chlebek
Coronary Artery Disease Patient,
Heart Attack Survivor, WomenHeart Champion

Coronary artery disease is the build-up of plaque in the arteries of the heart and can lead to heart attack, stroke, and death. Watch the real stories of people living with coronary artery disease, atrial fibrillation, venous thromboembolism, and other common causes of stroke, and see first-hand how serious these conditions can be. These advocates all share the mission of educating patients and their loved ones about stroke risk and prevention, so that they can Celebrate a Year Without a Stroke.
